Tips rápidos para WP-CLI

Introducción

Wp-cli es una herramienta muy potente para los webmaster y administradores de sitios. Es un cansancio y una hartura la falta de compromiso de los clientes y de sus empresas de mantenimiento de la página web (esos mismo que luego van diciendole al cliente que deberían migrar su contenido a sus servidores, que ellos, son diseñadores, desarrolladores, hostess, pintores y mecanicos de vuelo, si hace falta, pero luego no tienen ni backups, ni seguridad, ni nada)

Actualiza todo

Funcionara si no hay problemas derivados por php obsoleto, algun plugin desastre, etc,

Estructura de cPanel

```
cd ~/public_html && wp core update && wp plugin upgrade --all && wp theme upgrade --all
```

- Algunas veces puede darnos problemas de memoria. Un tip rápido Error con WP-CLI en el shell con cPanel - PHP Fatal error: Allowed memory size of bytes exhausted
- Otras veces tenemos problemas con las versiones obsoletas de php, Problemas por la versión shell usada y wp-cli

```
php -d memory_limit=512M "$(which wp)" core update && php -d memory_limit=512M "$(which wp)" plugin upgrade --all  && php -d memory_limit=512M "$(which wp)" theme upgrade --all
```

Normal

```
wp core update && wp plugin upgrade --all && wp theme upgrade --all
```

Usuarios

Crear un administrador de Wordpress con wp cli

```
# wp user create
$ wp user create castris fake@castris.com --role=administrator
Success: Created user 12.
Password: 0VV3gUlNMECOPIESQUENOVALGOGFO4ht
```

Borrar un usuario de Wordpress con wp-cli

```
wp user delete
wp user delete 12
--reassign parameter not passed. All associated posts will be deleted. Proceed? [y/n] y
Success: Removed user 12 from http://www.dunlopillo.es.
```

Activar el auotupdate de los plugins

```
wp plugin auto-updates enable --all
```

wp pluing

Forzar la actualizacion del WP con WP Cli

A veces entramos en un bucle feo, proque el usuario tiene o anda con versiones 54, o simialr, y no hay manera.

Quizas tambien fue hackeado y manipulado.

```
wp core download --force
```

> Atención a este método. Siempre backup antes, por favor

Ejemplo

```
[comprascc@srv109 public_html]$ php -d memory_limit=512M "$(which wp)" core update && php -d memory_limit=512M "$(which wp)" plugin upgrade --all  && php -d memory_limit=512M "$(which wp)" theme upgrade --all
```

```

Actualizar WP Cli

Como root si la aplicación esta en el sistema de forma global

```
sudo wp cli update
You have version 2.5.0-alpha-3f4c34b. Would you like to update to 2.5.0? [y/n] Y
Downloading from https://github.com/wp-cli/wp-cli/releases/download/v2.5.0/wp-cli-
2.5.0.phar...
md5 hash verified: 20ab512b12d766a2d2f51cc8f5c43411
New version works. Proceeding to replace.
Success: Updated WP-CLI to 2.5.0.
```
